

ATI Test Results Static Coefficient of Friction

This testing was based on ASTM D2394 criteria for wet and dry static coefficient of friction.

Reàl Decking

Average dry surface rating = 0.86

Average wet surface rating = 0.89

Passport Decking

Average dry surface rating = 0.86

Average wet surface rating = 0.89

American Classic Decking

Average dry surface rating = 0.86

Average wet surface rating = 0.89

Trailways Decking

Average dry surface rating = 0.86

Average wet surface rating = 0.89

Gossen Decking meets or exceeds the American Disabilities Act (ADA) requirements for wet or dry static coefficient of friction.

These ratings place our decking at the upper levels of the category for alternative decking materials. This would include cellular PVC and also traditional wood/plastic composites.
