

FOR IMMEDIATE RELEASE

8/01/2008 - Gossen completes Architectural Testing / Code Compliance for WeatherReady Deck Boards.

Buyers, contractors, specifiers, distributors, and others need to know the materials they're using have been tested and certified. Gossen Corporation's new family of WeatherReady™ exterior materials has recently completed a rigorous compliance testing by *Architectural Testing* earning its CCRR-0124 compliance. It has also met ICC-ES acceptance criteria for AC 10 quality control.

"Our newly certified family of WeatherReady™ exterior materials draw upon our 80-year history of leadership in moulding profiles and building products," says Gossen president Jef Butterfield. "WeatherReady Decking, TrimBoard, Moulding and Railing components are designed and distributed to favor building industry expectations for products that perform consistently, reduce installation time and look great."

Available in common building dimensions, WeatherReady is lead-free, R4, manufactured in the United States to strict industry standards, is ARCAT green compliant as a product for sustainable design, and now carries a CCRR-0124 rating.

Gossen is America's first manufacturer of cellular PVC and is still its leading innovator after 40 years. Today, Gossen Corporation is one of the largest manufacturers and suppliers of cellular PVC profiles.
